The screenshot shows a Kali Linux virtual machine running Oracle VM VirtualBox. The main window displays the Burp Suite Community Edition v2023.3.12 interface. The target is set to https://juice-shop.herokuapp.com. The Request tab shows a GET request to /rest/tomato HTTP/1.1. The Response tab shows an HTTP/1.1 500 Internal Server Error. The Inspector tab shows the request and response details. The CPU usage is 8.7%.

PRIVACY POLICY EXPOSURE

The screenshot shows a web browser window with the URL `lms.simplilearn.com/courses/7503/IITK-CS---Application-Security,-Vulnerability-Management,-and-Cyber-Resilience/practice-labs`. The page title is "IITK CS - Application Security, Vulnerability Management, and Cyber Resilience". The page indicates "Sessions attended : 80% | Projects passed : 0".

Below the course information, there is a section titled "PG_Cybersecurity_Lab". A notification states: "This Lab will get reset on 14th September 2025, 6:57 PM".

The main content area displays a virtual machine window titled "Cybersecurity Lab". The VM is running Kali Linux. The terminal shows the command `https://juice-shop.herokuapp.com/#/privacy-security/priva...` being entered. The browser window displays the "Privacy Policy" page of the OWASP Juice Shop. The policy is effective as of March 15, 2019, and states that OWASP Juice Shop ("us", "we", or "our") operates the `https://juice-shop.herokuapp.com` website (the "Service").

The policy text includes:

- This page informs you of our policies regarding the collection, use, and disclosure of personal data when you use our Service and the choices you have associated with that data. Our Privacy Policy for OWASP Juice Shop is created with the help of the [Free Privacy Policy website](#).
- We use your data to provide and improve the Service. By using the Service, you agree to the collection and use of information in accordance with this policy. Unless otherwise defined in this Privacy Policy, terms used in this Privacy Policy have the same meanings as in our Terms and Conditions, accessible from <https://juice-shop.herokuapp.com>.

The section "A. Information Collection And Use" is partially visible at the bottom of the page.

The screenshot shows a Kali Linux virtual machine environment. The primary application is Burp Suite Community Edition v2024.3.1.4, configured with a temporary project. The interface is set to the 'Repeater' tab, where a single HTTP request is being managed. The request is a GET to the endpoint '/rest/products/search?q=banana' on the target 'https://juice-shop.herokuapp.com'. The response, which is a JSON object, contains user details such as 'id', 'fullName', 'zipCode', 'city', 'state', and 'country'. The 'Inspector' panel on the right provides a detailed view of the request and response headers and body. The system clock indicates it is Saturday, September 20, 2025, at 06:39.
